## DŮLEŽITÉ

Předtím, než začnete sestavovat tento skleník, si pečlivě přečtěte tyto pokyny. Uchovávejte tyto pokyny pro další potřebu na bezpečném místě.

### ⇒ Oddělení péče o zákazníky

Pro pomoc s montáží nebo objednání náhradních dílů se přihlaste na naše webové stránky nebo zavolejte na naši servisní linku (číslo je uvedeno na titulní stránce).

Další informace můžete nalézt na našich webových stránkách: [www.palramapplications.com](http://www.palramapplications.com)

### ⇒ Bezpečnostní tipy

- Je nanejvýš důležité sestavit všechny části podle návodu. Nevynechávejte žádný krok.
- Důrazně doporučujeme při sestavování používat pracovní rukavice.
- Při práci s extrudovaným hliníkem noste vždy obuv a ochranné brýle.
- Pokud používáte schůdky nebo elektrické nástroje, ujistěte se, že můžete dodržet bezpečnostní pokyny jejich výrobce.
- Nedotýkejte se nadzemních elektrických kabelů hliníkovými profily.
- Nepokoušejte se sestavovat skleník při silném větru nebo za deště.
- Bezpečně vyhodte plastové obaly - uchovávejte je mimo dosah dětí.
- Zabraňte dětem v přístupu do oblasti montáže.
- Během stavby se o skleník neopírejte a netlačte na něj.
- Skleník neumísťujte do míst vystavených nadměrnému větru.
- Nepokoušejte se sestavit tento skleník, pokud jste unaveni, pod vlivem léků nebo alkoholu nebo máte sklony k závratím.
- Ve skleníku nesmí být skladovány horké předměty, jako např. nedávno používané grily, autogeny atd. Před vložením kolíků se ujistěte, že v zemi nejsou žádná skrytá potrubí nebo kabely.
- Tento produkt je určen k použití pouze jako skleník.

### ⇒ Péče a údržba

Pokud váš skleník potřebuje vyčistit, použijte slabý roztok detergentu a opláchněte jej čistou studenou vodou. Na čištění panelů NEPOUŽÍVEJTE aceton, abrazivní prostředky nebo jiné speciální detergenty.

### ⇒ Nástroje a vybavení

- Měřicí pásmo
- Pracovní rukavice
- Plastová nebo gumová palička
- Mazadlo
- Křížový šroubovák
- Schůdky

- Vrták
- Velké kladivo
- Nůžky
- Klíč
- T001

### ⇒ Před montáží

Tato montáž se nejlépe provádí ve dvou lidech. Na montáž si vyhradte alespoň půl dne.

**Výběr lokality** - skleník musí být **sestaven**, umístěn a upevněn na pevný a rovný povrch.

Vyberte slunné místo, které bude z dosahu větví stromů.

Důrazně doporučujeme upevnit skleník přímo na pevné betonové základy. V takovém případě použijte předvrtané otvory v kovové základně.

**Vyjměte všechny** součásti z balení. Roztřídte součásti a zkontrolujte podle přiloženého seznamu.

Během montáže je dobré mít součásti na dosah ruky. Všechny malé součástky (šrouby atd.) uchovávejte v misce, aby se nemohly ztratit.

### ⇒ Během montáže

Montážní kroky dodržujte v pořadí, jak je uvedeno v instrukcích.

**Krok 1:** Ujistěte se, že základna je pravoúhlá, změřením úhlopříček a vyrovnaním vodováhou.

**Krok 4:** Části A994, A995 jsou na zadní stěně skleníku.

**Kroky 8, 11 a 15:** Montáž dveří (**Kroky 8, 44-50**) Dveře mohou být nainstalovány s jako pravé nebo levé, podle vašeho rozhodnutí. Tento manuál zobrazuje montáž pravých.

**Krok 8:** Určete směr dveří, protože kde bude umístěn dveřní závěs, bude dveřní sloupek **987**.

**Kroky 56-61:** Návod ukazuje montáž pravých dveří.

**Krok 41:** Před montáží se rozhodněte, kde bude umístěné okno. Okno může být nainstalováno v jedné z označených možností.

**Krok 67:** Ihned po dokončení montáže, pevně spojte skleník se základnou a základnu kolíky ukotvíte do země.

**Šrouby 411 a matice 412 se používají během celého procesu montáže.**

- Šrouby 411 jsou určeny pro montáž z vnějšku a matice 412 zevnitř skleníku.
- Neutahujte šrouby a matice (411 & 412) více než o 2 až 3 otáčky. Nedotahujte je, dokud nedokončíte sestavování panelů, pokud není uvedeno jinak.
